

# Are Time And Budget Pressures Stressing You Out

**We've Helped Companies Reduce  
Their IT Development Cost  
& Cut Project Schedule by 50%**

## **Achieving A Competitive Advantage Through Strategic IT Partnering**

Cost reduction and rapid time-to-market are key factors in gaining a competitive advantage in today's global economy. To achieve this advantage, a key strategic imperative for companies of all sizes is, collaboration with the right outsourcing IT partners.

Shaantek Consultants offers offshore outsourcing management and consulting services specializing in Software and Web development, Embedded Systems, IT-enabled services and Business Process Automation.

## **Manage Risk By Selecting An IT Partner With The Right Business Model**

Our business model is a combination of offshore & onshore resources: we staff our teams with analysts, architects, strategists and project managers onshore, while the programmers, coders & testers work offshore, allowing for a 24-hour work schedule on projects.

## **Just Like The Manufacturing Sector Benefits from Just-in-time Methodologies, Your Project Can Benefit From An Agile Staffing Model**

Our dual focus on process and technology allows us to develop an effective strategy for workforce optimization and reach the ideal balance between onshore, near-shore and offshore team resources for your project. This allows you to reduce your staffing overhead costs, and/or take on new initiatives with existing staffing.

*With Shaantek Consultants as your outsourcing project partner, YOU can reach your business goals much faster.*
